

EXSTO™

PRESS RELEASE

EXSTOPOD™ – THE ULTIMATE SOLUTION TO NOISE POLLUTION

Exsto Asia Pte Ltd is pleased to present Exstopod™ at the Office Expo Asia 2020, The Virtual Edition. A mobile range of acoustic pods are curated for user whom seeks privacy in a working environment to conduct ad-hoc discussion and meetings. The pods come in various sizes to accommodate different (number of) groups of people, adaptable in various interior spaces.

With the increasing demand of privacy and noise control in working environments, pods are emerging in the market designed to combat effects of noise in open spaces. These acoustic pods can be situated at specific places to allow more privacy in peace which in turn increases productivity.

Exstopod™ have achieved a high acoustic rating with TUV - 32 NIC (Noise Isolation Class) and a good indoor air quality reading of below 0.005 mg/m³ emission of formaldehyde with SGS Certification. Internal features of the pods include energy efficiency with centralized motion sensor that prevents energy wastage when it is vacant, and a well-ventilated interior to keep user comfortable at all time. External features such as its robust construction is achieved through the use of powder coated electro-galvanized steel, alongside its portable feature to allow timeless relocation by dismantling and re-assembly.

Branded as Singapore's leading privacy and meeting pod, Exstopod™ is recognised by a variety of industries such as local government agencies, educational institutions, finance industries, co-working spaces and more. Exstopod™ have also delivered numerous projects with satisfactory results.

Find out more Exstopod references here www.exsto.com.sg/exstopod-projects-gallery or visit Exsto Asia's showroom to experience peace and privacy now.
