

About Wondershare

Founded in 2003, Wondershare is a global leader in software development and a pioneer in the field of digital creativity. Our technology is powerful, and the solutions we provide are simple and convenient. That's why we're trusted by millions of business users in over 150 countries worldwide. We help our users pursue their passions so that, together, we can build a more creative world.

Meet Wondershare Filmora

Launched in 2015 by Wondershare Technology, Filmora now empowers millions of video creators around the world. We provide intuitive software that lets young editors expand their creativity and publish the kinds of digital content they love consuming. Filmora is 'For the Inspired' - you know what you want to make, and we make it possible.

As of now the Filmora product line includes two desktop video editors (Filmora9 and FilmoraPro), a mobile app (FilmoraGo), a screen recorder (Demo Creator), and a stock service that supplies video effects, footage, and more (Filmstock). More products will be added as Filmora finds new ways to support video creators.

Filmora X will be launched in this October, stay tuned.
